

diamond

operation area

- Procedure:** Coating / care
- Surfaces:** all water-resistant coverings such as e.g. B. PVC, linoleum, rubber and other plastic floors and natural stone (e.g. marble) and Artificial stone floors (e.g.: terrazzo), (acrylic lacquer) sealed parquet floors, Screed floors (after priming with pore filler) etc.
- A notice:** Not suitable for unsealed wood and cork surfaces as well factory-made PUR-coated coverings.

Item No. g0680 canister 10 L

load level

pH=8

in the concentrate

Characteristics

- § Very hard, high-gloss coating
- § Perfect flow with excellent filling power
- § Suitable for high-speed and spray-cleaner method
- § Low-foaming - to avoid disturbances during counteract film formation

advantages

- § For areas with high stress/frequent traffic, where a very high gloss is required
- § Very tough and wear-resistant
- § Sure-footed

sustainability and ecology

Label-free product

Sustainability and careful use of the environment and resources have always been the focus at hollu. As a specialist in We ensure that cleaning products and solutions for commercial users are ecologically compatible – from the Raw material selection and production to delivery. At the same time, we support our customers with training courses, detailed Cleaning plans and the latest dosing technologies in daily product use - for the benefit of economy and ecology. This We prove this through certification according to ISO 14001 (environmental management system) and EMAS certification. We also take into account the careful use of energy and water and the recyclability of our packaging materials. The bundles exist made of PE and recyclable cardboard and can be disposed of at the appropriate waste collection points. canisters can be returned empty.

application

Prerequisite: Thoroughly cleaned, neutralized and dry floor covering (free of surfactants). Allow underfloor heating to cool down in good time / close windows.

Perform coating: Apply thin and evenly, preferably with hollu Met-Wiesel. Further applications are only possible after complete drying (approx. 20 - 30 minutes). For new coatings apply 1-2 times. The protective film can be fully loaded after 1-2 days. Wipe new coatings with a damp cloth for approx. 1 week using only clear water.

dosage

undiluted

Range

Approx. 20-35 m² can be coated with 1 L of coating.
Depending on the absorbency of the covering.

Compatible system products

55821 - Mead weasel, without stem; 55822 - Met Strip, cover; (suitable handles: item no. 56966, 56967, 56968 or 56969)

storage notice

The product can be stored in the temperature range from 4 °C to +40 °C. Shelf life: 2 years. Opened containers: For the storage of product residues, it is advisable to fill them into smaller containers so that as little air as possible is trapped in the container.
